MID-MARKET GRID[®] REPORT FOR SAAS BACKUP SPRING 2024

Mid-Market Grid[®] Report for SaaS Backup |
Spring 2024 is based off of scores calculated
using the G2 Grid[®] algorithms from reviews
collected by March 05, 2024.

“Way better than Veeam. Easy to
setup, monitor and run restores.
We were running Veeam O365
backup, but we had to maintain
an Azure VM and Azure storage.
Between the Veeam licenses
and the Azure costs Spanning
was less and easier to maintain.”

"Implementation took all of 15 minutes and it is a set it and forget it type of product. All new mailboxes, OneDrive folders and SharePoint sites are automatically backed up without any admin intervention."

G2 Reviewer

"We have been using Spanning as a backup solution for Office 365 for almost four years now... I receive a daily backup summary for all users data files (e.g. Outlook, Calendar and files.) We've only had to recover files 1-2 times, and it was a very easy process to follow. The files were recovered in a matter of minutes."

"I've never had an easier setup for a backup solution than Spanning. It was easy as log in to Spanning, Auth for MS365 and... done. Office365 backups and Dark Web monitoring... made much easier than other solutions."

_____ G2 Reviewer

"I like knowing that Spanning has our back, when process, or even Microsoft, can sometimes let us down"

_____ G2 Reviewer

"Spanning backup for Salesforce is a game-changer for saving time and peace of mind. Spanning automatically backs up critical Salesforce data and allows us to easily manage our storage capacity and restoration of data when needed. It's amazing to be able to restore the entire record as if it was never deleted when needed."
